Fertilizer Research **37:** 245–246, 1994.

CONTENTS Volume 37 1994

Volume 37 No. 1

Environmental impact of fertilizing soils by using sewage and animal wastes 1
G. Benckiser, T. Simarmata

Exchangeable and non-exchangeable phosphate sorption in Portuguese soils 23
M.L.V. Fernandes, G.P. Warren

Influence of soil organic carbon on the interpretation of soil test P for wheat grown on alkaline soils 35
D.K. Benbi, S.P.S. Brar

Nitrogen leaching and plant uptake from controlled-release fertilizers 43
R.L. Mikkelsen, H.M. Williams, A.D. Behel Jr.

Plant response to the management of fluid and solid N fertilizers applied to furrow-irrigated corn 51
C.H. Pearson

Kinetics of field oxidation of elemental sulfur in New Zealand pastoral soils and the effects of soil temperature and moisture 59
J.H. Watkinson, A. Lee

Partially acidulated phosphate rocks: Controlled release phosphorus fertilizers for more sustainable agriculture 69
S.S.S. Rajan, M.B. O'Connor, A.G. Sinclair

Volume 37 No. 2

The effect of controlled-release fertilizer 'Osmocote' on growth, yield and composition of onion plants 79
E.B. Amans, J.H.G. Slangen

Ammonia volatilization from urea and ammoniacal fertilizers surface applied to winter wheat and grassland 85
S.G. Sommer, C. Jensen

Crop nitrogen utilization and soil nitrate loss in a lettuce field 93
L.E. Jackson, L.J. Stivers, B.T. Warden, K.K. Tanji

Response of ensete (*Ensete ventricosum* W.) to minteral fertilizers in southwest Ethiopia 104
Y. Uloro, K. Mengel

Comparison of the P_i, Colwell, Bray 1, calcium acetate lactage (CAL) and Truog soil phosphorus test for predicting growth of oats, barley, triticale and clover in the field in lateritic soils fertilised with superphosphate and rock phosphate 115
V. Kumar, M.D.A. Bolland, R.J. Gilkes

A comparison of five soil phosphorus tests for five crop species for soil previously fertilized with superphosphate and rock phosphate 125
M.D.A. Bolland, V. Kumar, R.J. Gilkes

Identification of residual P compounds in fertilized soils using density fractionation, X-ray diffraction, scanning and transmission electron microscopy 133
V. Kumar, R.J. Gilkes, T.M. Armitage, M.D.A. Bolland

Chemical characterization and agronomic effectiveness of phosphorus applied as a polyphosphate-chitosan complex 151
E. Frossard, P. Tekely, J.L. Morel

Nitrogen application and underground water contamination in some agricultural soils of South Western Nigeria 159
M.T. Adetunji

Special section
Methane and nitrous oxide: the other greenhouse gases

Guest editors: A.R. van Amstel, A.R. Mosier

Preface 165

Methane from rice production 167
K. Minami

An overview of present knowledge on methane emission from biomass burning 181
R. Delmas

Nitrous oxide emissions from agricultural soils 191
A.R. Mosier

The measurement of nitrous oxide emissions from sewage systems in Belgium 201
W. Debruyn, M. Wevers, J. van Rensbergen

Methane production/emission in storages for animal manure 207
G. Zeeman

Methane and nitrous oxide emissions: an introduction 213
A.R. van Amstel, R.J. Swart

Regular research papers

The effect of nitrogen catch crop species on the nitrogen nutrition of succeeding crops 227
K. Thorup-Kristensen

The efficiency of fertilizer nitrogen in irrigated, direct seeded rice (*O. sativa* L.) in Europe 235
N.C. Stutterheim, J.M. Barbier, B. Nougaredes
